

Introducing...

The Buddy™

A Handbook for Carers **BOOK** Assisting with Medications

Quality Use of Medicines – (useful topics on how to contribute to a client's safe, effective, appropriate and judicious use of medications and maximise non-drug approaches).

Diagnosis Items – (easy to understand information on common diagnoses, their medication treatment and non-drug therapies and handy hints for client care).

Medication Items – (practical information for medication competent carers on specific drugs to support their client's safe and effective use of medicines).

Medication Competency Training – (comprehensive refresher material for carers maintaining competency in assisting clients with medications).

Michael Bonner is a clinical pharmacist specialising in medication management for elderly persons living in the community and residential aged care setting. Michael is passionate about empowering care staff to have an increasingly important role in a client's health & wellbeing.

As founder of Choice Aged Care, Michael is contracted by many of Australia's leading aged care providers to deliver high-impact medication reviews and other Quality Use of Medicines services.

Michael's RTO (Smart Nation Education) is also establishing itself as a leader in Nationally Recognised Training for aged care workers.
