

Microbe Surface Testing - Booking Form

What Are the Benefits?

- ◇ This is the only evidence based method to confirm to stakeholders (Board members through to consumers) that the facility's environment related infection control or outbreak management procedures are effective.
- ◇ The service identifies opportunities for continuous improvement in environmental cleaning and hand hygiene practices.
- ◇ Exhibits high-level compliance to Quality Framework Requirements Standard 3 (3)(g); Standard 5 (3)(b); and Standard 8 (3)(e).
- ◇ A proactive service that categorically helps protect residents and staff from infection, minimising health complications & staffing disruptions.

FREE baseline and annual service for Choice Aged Care clients

What's Involved?

- 1) Our Clinical Pharmacist visits your facility and conducts agar dip-slide swabs (6 randomised test sites are completed out of 30 established benchmarked objects & surfaces).
- 2) The samples are placed into Choice Aged Care's nearest incubator (Brisbane, Sydney or Melbourne).
- 3) *Total Microbe Count* is analysed 24 hours later, benchmarked via the PPASS-3 Tool and results with recommendations are submitted to management.
